LME Metals Report

Written by Edward Meir – Commodity Research Group Tel: 1-203-656-1143 • <u>emeir@edfmancapital.com</u> <u>WWW.EDFMANCAPITAL.COM</u>

This commentary was written at 7:50 A.M. on September 22, 2022, US EST.

It was an ugly day in the US equity markets on Wednesday after the Fed's policy statement came out. The statement bluntly noted that it "anticipates that ongoing increases in the target range will be appropriate," quashing any hopes for a more nuanced message on rates. Jay Powell's subsequent press conference was hardly any more reassuring as the Chairman came across as the more hawkish Powell of August as opposed to the more dovish Powell from July. On the rate front -- and as expected -- the Fed raised the funds rate by 75 basis points to 3-3.25% and it now projects another 1.25% of rate hikes through year-end, bringing the fed funds range to 4.4%. Fed funds are expected to peak at 4.6% early next year and then begin to decline to 3.9% in 2024 and to 2.9% in 2025. (Having said that, the Fed's "dot-plot" forecasts are notoriously wrong-the ones from this time last year had current rates at about .75%).

Powell reiterated that it was job #1 for the Fed to break the inflation cycle before inflationary expectations, which are well anchored for now, start to move higher. "The historical record cautions strongly against prematurely loosening policy," he noted. Powell was pretty pessimistic on what he was seeing on the inflation front thus far, noting that the PCE index (a favored Fed inflation gauge) is pretty much unchanged from year-ago levels.

US credit markets were all over the place in the wake of the announcement; both the ten year and the two-year treasury made new highs just as Powell spoke, getting to 3.62% and 4.11% respectively, but retreated thereafter to settle at 3.51% and 3.95%. We are a few basis points lower right now.

In Asia, equity bourses ended slightly lower overnight and European exchanges are mostly lower right now but have recovered from earlier losses. The Swiss National Bank joined the rate hike campaign earlier today with a 75-basis point increase and Norway's and Indonesia's central banks also raised rates, as did the South African Reserve Bank. The Bank of England just moved as well, raising its borrowing levels to 2.25% from 1.75% and said it would continue to "respond forcefully, as necessary" to fight inflation. The BoE estimates that Britain's economy will shrink by .1% in Q3 which, combined with the contraction in Q2, meets the definition of a technical recession. For its part, the BoJ left policy unchanged, but launched currency intervention to prop up the yen. The yen is up sharply right now (at 142.50) but we don't expect these gains to last as central bank interventions typically fail after the initial flurry is over.

Edward Meir/Commodity Research Group ("CRG) is an independent consultant to E D & F Man Capital Markets Inc. ("MCM ") focusing on metals commentary. Neither Edward Meir or CRG have a personal futures trading accounts. The information contained in this material should be construed as market commentary, merely observing economic, political and/or market conditions, and not intended to refer to any particular trading strategy, or specific trade recommendation, promotional element or quality of services provided by MCM Inc. or E D & F Man Derivatives Products Inc. The trading of derivatives such as futures, options and OTC products or swaps may not be suitable for all investors. Derivative trading involves substantial risk of loss, and you should fully understand those risks prior to trading.

Most major other currencies are slightly higher against the dollar compared to the lows we saw yesterday (post-Fed). The Euro is now at .9877, sterling is at 1.1317, while the Canadian dollar is at 1.3465.

We thought that commodity markets would fall alongside equities today and although there was some weakness early in the Asia session, things seem to have stabilized and we are seeing modest gains right now in both base metals and oil. US stock index futures have erased earlier declines and are now up, perhaps contributing to the steadier tone we are seeing. In the base metals space, lead in leading the pack with a nearly 3% gain.

In US macro news, we learned on Wednesday that total housing starts increased 12.2% month-over-month in August to a seasonally adjusted annual rate of 1.575 million (consensus 1.448 million), driven by a 28% increase in multi-unit starts. (Single-family starts were up 3.4%). Building permits, though, were down 10% month-over-month to a seasonally adjusted annual rate of 1.517 million (consensus 1.610 million), driven lower by a 18% decline in multi-unit permits and a 3.5% decline in single-family units. The key takeaway from the report is that the weakness in permits is likely not sustainable, especially given that mortgage rates have risen since July-August and are now over 6%. In addition, the NAHB housing market index for September, out on Tuesday, showed yet another decline in homebuilder sentiment and so we would not reach too much into these numbers.

Later today, we get weekly initial claims (expected at 214,000, unchanged from the previous week) along with leading economic indicators for August (expected at -.1%, last -.4%). But for now, most markets are still coming to grips with the "higher for longer" rate scenario laid out by Powell at Wednesday's news conference.

COPPER -- SUPPORT: \$7,590 / RESISTANCE: \$8,153

We are at \$7,750, up \$60 and just about where we were at this time on Wednesday. We have been trading between \$7,590-\$7,848 so far today.

* The **global refined copper market** showed a 30,000 ton deficit in July, compared with a 105,000 ton deficit in June, this according to the International Copper Study Group.For the first 7 months of the year, the market was in a 126,000 ton deficit compared with a 183,000 ton deficit in the same period a year earlier, the ICSG added.

* LME stocks rose by 4,775 tons today and are up some 20,000 tons over the last week.

ALUMINUM -- SUPPORT: \$2,198 / RESISTANCE: \$2,370

We are at \$2,226, up \$24. We have been trading between \$2,241-\$2,271.

* **Goldman's Sachs** new price targets on all on a 3/6/12M basis are \$2,100/2,450/2,750/ton, with the 2022 average expected to come in at \$2,686 vs. the previous estimate of \$2,916.

Edward Meir/Commodity Research Group ("CRG) is an independent consultant to E D & F Man Capital Markets Inc. ("MCM ") focusing on metals commentary. All references to and discussion of OTC products or swaps are made solely on behalf of MDP, a member of the NFA and provisionally registered with the CFTC as a Swap Dealer. MDP's products are designed only for individuals or firms who qualify under CFTC rules as an ECP and who have been accepted as counterparties of MDP. The trading of derivatives such as futures, options and OTC products or swaps may not be suitable for all investors. Derivative trading involves substantial risk of loss, and you should fully understand those risks prior to trading.

* **Global primary aluminum output** in August rose 3.49% year on year to 5.888 million tons, this according to the International Aluminum Institute. Estimated Chinese production was 3.5 million tons in August, the IAI added.

* The **LME** reported that it does not see evidence of metal moving into its warehouses after Bloomberg reported on Tuesday that Rusal was working on a plan to deliver its metal into LME sheds. Metal movement has remained relatively constant over the last 12 months, the LME added.

* On a related noted, Bloomberg quotes the **CEO of Rio Tinto** as saying that the unrestricted flow of Russian aluminum into the US is making North American producers less competitive. US trade data shows that Russian ali imports into the US were up almost 60% last month from April. "It's actually very difficult to have a profitable aluminum industry in North America at this point in time because Russian aluminum is flowing in," Rio's CEO was quoted as saying.

ZINC - SUPPORT: \$3,056 / RESISTANCE: \$3,322

We are at \$3,130, up \$31. We have been trading between \$3,080-\$3,148.

* Reuters notes that the **global zinc market** moved to a deficit of 72,800 tons in July from a surplus of 34,600 tons a month earlier, this according to data from the **International Lead and Zinc Study Group**. During the first seven months of 2022, there was an 83,000-ton surplus vs. a deficit of 23,000 tons in the same period of 2021.

LEAD -- SUPPORT: \$1,843 / RESISTANCE: \$1,975

Lead is at \$1,888, up \$51. We have been trading between \$1,843-\$1,897.

NICKEL -- SUPPORT: \$23,050 / RESISTANCE: \$25,325

We are at \$24,885, down \$64. We have been trading between \$24,660-\$25,105.

TIN -- SUPPORT: \$19,760 / RESISTANCE: \$22,345

We are at \$21,650, up \$480. We have been trading between \$21,105-\$21,695.
